

ENKI INNOVA

Cyber Security, AI and Cloud

The Name of the Company

The name "Enki" is inspired by the Sumerian god of water, wisdom, and creation. "Innova" derives from innovation, modernization, and invention. The name reflects the Iraqi (Baghdadi) founders' deep love for their homeland, its history, and civilization even though they have lived in the West as expatriates for two decades.

When do you Need our Services?

Digital Transformation: Do you need to upgrade your company's technical infrastructure?

Secure AI Solutions: Are you looking for a secure AI system to process confidential data online?

Certifications and Restructuring: Do you need ISO 27001 certification or a full restructuring of your operational processes (e.g., in banking)?

Global Payments Compliance: Do your banks need to adopt PCI-DSS standards to enable global transactions?

Critical Infrastructure Security: Do you need to protect essential systems (like electricity, defence, water, etc.) from cyber threats?

Vision

Enki Innova aims to lead the enhancement of digital security in Iraq through innovative solutions. We see modern technology and cybersecurity as two fundamental pillars for institutional success. We support banks, government, and private sectors in their secure digital transformation ensuring data protection and cloud system efficiency to enable Iraq to integrate into the global digital economy with a balance of security and innovation.

Mission

Our mission at Enki Innova is to provide integrated technology and cybersecurity solutions aligned with international standards. We empower organizations to build best practices in cybersecurity, cloud solutions, and artificial intelligence to ensure efficiency and safety. We are committed to supporting digital transformation, enhancing performance, ensuring information security and business continuity, and being a trusted partner in maximizing the value of technology.

Scan the code

Business Development and Strategy

Identifying growth opportunities, data analysis, and generative AI.

Digital Transformation and Identity Management

Integration of cloud and hybrid systems, electronic identity management, modern authentication (Zero Trust).

IoT and ICS Security

Industrial systems security assessment and strengthening industrial networks.

Business Continuity and Disaster Recovery (BCDR)

Impact analysis and risk assessment, backup and data recovery.

Physical Security, Risk Management, and Compliance (GRC)

Facility security assessments (ISO 27001), security gap analysis, and third-party risk management.

Enki Innova Scope of Services

Cloud Services and Systems Engineering

Ready-made cloud solutions, cloud migration and optimization, system design using Docker and Kubernetes, re-engineering systems, monitoring and analytics.

Project Management and Training

Project management training and change management.

Cybersecurity and Infrastructure Protection

Access control systems, fibre optic projects, secure system development lifecycle evaluation, compliance with security standards, and cybersecurity risk management.
